

Reasons for BECOPAD Depth Filter Media:

- 1 Gentle filtration:
Preserves valuable color and flavor (hop oil, anthocyanins)
- 2 Saves time and money:
Increases efficiency by up to 20%
- 3 High safety:
Microbiologically unsurpassed retention
- 4 Almost drip-free filtration:
Minimizes product loss
- 5 Produced from pure cellulose:
Natural and 100% biodegradable
- 6 Environmentally friendly:
Saves up to 50% of water during neutral rinsing and backwashing

Gentle Filtration for Beverages

Preserve valuable taste, flavor and color with original BECOPAD Depth Filter Media.

Combining our extensive experience in the production of BECOPAD depth filter media with modern technologies that incorporate BECOPAD *inside* different solutions allow us to cover the broadest range of customer applications.

Our goal is to provide our customers in the food and beverage industry with gentle and economical depth filter media for their high-quality products.

BECOPAD depth filter media adheres to the strictest standards of microbiological safety along with the ability to preserve valuable flavor and color. Nine grades of clarifying sharpness from coarse to sterile filtration are available.

Also available alongside the BECOPAD flat sheet is the BECODISC® stacked disc cartridge.

BECOPAD Depth Filter Media: 1 Solution in 2 Designs

BECOPAD Depth Filter Sheets

- Increase in filtration efficiency of up to 20 %
- Reduction of rinsing volumes of up to 50 % resulting in lower process costs
- Up to 99 % drip-free filtration
- Excellent dirt holding capacity
- High germ-retention capability
- Low ion content
- Biodegradable

BECODISC Stacked Disc Cartridges

- Stacked Disc Cartridges with BECOPAD depth filter media *inside*
- Compact and enclosed system
- Large filter area in a small space
- Easy handling
- Safe sterilization and simple cleaning

BECODISC R+ Stacked Disc Cartridges

- Extra robust stacked disc cartridges with BECOPAD depth filter media *inside*
- Backflushable version with increased service life
- Very high robustness due to the special design
- No additional backflushing kit is required
